

# Drinking Party

## Team: JJJ

Naoki Tsuda, Yuki Kikuya, Tatsuya Eshiro

### ABSTRACT

We developed a random system video-chat application for a lonely person who drinking at home by using Internet Communication.

#### 1. Introduction

##### 1. 1 Research motive

We wanted to develop the application for killing time because we had developed systematic applications so far.

##### 1. 2 Research issue

- Audio&Video Communications by using WebRTC
- A random match making system

#### 2. Development environment

##### 2. 1 Using soft-were

- Android-Studio
- MySQL

#### 3. Production

##### 3. 1 Application abstract

Development Application for Android Smartphone. A random system video-chat application by using Internet telephone.

##### 3. 2 Conclusion

We had a difficult time with using and understanding the android activity Life-Cycle and Asynchronous communication.

And, our expectations rose communication technology in the future by understanding communication system of a WebRTC.
